SKILLS

Database & Programming Languages

Microsoft SQL and PostgreSQL,
Python(Pandas, Matplotlib, Numpy)
and R Programming Language

Visualization and Other Software Tools

Power Bi, Tableau, Microsoft
Excel, Google Sheets

Soft Skills and Others

Strong Googling
Ability to tell the story behind data
Strong analytical skills
Decision-maker & problem-solver

PROJECTS

Data Visualization Projects

- **Microsoft Excel Sales Dashboard**
I built this dashboard with the business questions I had like Which category or subcategory is sold out more? Here is the link to my [medium](#) article about project.
- **Power Bi Covid-19 Dynamic Report**
Apart from general country-covid-19 analysis, I have created an estimated active case measure by using complex Dax Measure. Here is the link to my [project](#).

Exploratory Data Analysis Project

- **Covid-19 SQL Data Exploration**
Apart from using metrics like Total Cases/Population, New Deaths/New Cases, I could answer the question of Which day of the week do countries get the more new cases by using Window functions. Here is the link to my [GitHub](#) repository about project.

Data Cleaning Project

- **Cleaning Housing Data With SQL**
I troubleshoot problems like in one column for one category there more than one value like "Yes" and "Y". For more here is my link to project's [GitHub](#) repository.
